JADES GOODS-S 7496, z = 2.493: released-spectra remeasurement rejects a catalog lead
Released grating configurations disagree
G140M: Hβ away from edge
G235M: Hβ at blue edge
G235M finite data begins
Flux density (10⁻²¹ erg s⁻¹ cm⁻² Å⁻¹)
Observed wavelength (μm)
Joint Hα + [N II] fit
Observed wavelength (μm)
Physical anomaly fails configuration test
Catalog: PRISM blend
Catalog: G235M 5pix
Own fit: G140M Hβ
Own fit: G235M Hβ
Hα/Hβ (PRISM includes [N II])
Own fits use released coadds and diagonal reported errors; no calibration covariance. Aperture/nod variants share photons. Green band is a screening guide.
